January 2003 - A New Beginning

Following a successful start to autonomy the website has undergone a major overhaul. Sporting a new design, layout and advanced web features the FESR website is geared to be modern, user friendly and, above all, easy to maintain for the Volunteer Webmaster! One of the biggest developments was the incorporation of a new Visitors Log. The new guest forum supports multiple posting, fun avatars, the ability to add images and links, and offers on-line text messaging. The old Guestbook, which served the association well and earned it's right to retirement, has now been archived accordingly. We trust that visitors both old and new will appreciate the innovations applied. Please direct any site queries to the Site Administrator.
